ClickFax Secure HTTPS API

Updated 1/15/2010

Base URL: https://secure.datafabrication.com/cfp_customerapi/customerAPI_sendFax.asp

Query String Name	Text Sent (sample)	Description
Required:		
tofax	12125551212	*The fax number with a "1"*
compcode	99999-888888888	*Your ClickFax activation code*
nocover	1	*1 = no cover page sent. 0 = send a cover page*
fromemail	myemail@mydomain.com	*This is the email which confirmations will be sent back to*
Optional:		
fromname	Joe Blow	** An arbitrary name to be sent from. Will appear on cover page.*
tocompany	Acme Corporation	** An arbitrary company name to be sent to. Will appear on cover page.*
toname	Mary Smith	** An arbitrary name to be sent to. Will appear on cover page.*
subject	Fax as you requested	** If you have a cover page, specify the subject here*
body	Please read this immediately	** Add text for the body of the cover page*
		* = Will not be sent if you choose no cover page
Extra Pages (Optional):		
filetype_X	html	X is a number incremented from 1. File types can be "html" or "txt".
filedata_X	Sample HTML Text	X is a number incremented from 1. File data can be html or pure text.

NOTES:

If you specify {nocover=1}, no cover page will be sent. The optional fields will be ignored.
The optional fields will be sent back with the confirmation email, even if no cover page was selected. You can use this for tracking purposes.

Sample URL with query string name/values:

https://secure.datafabrication.com/cfp_customerapi/customerAPI_sendFax.asp?tofax=13128961530&compcode=99999-88888888&fromemail=myemail@mydomain.com&fromname=Bill Customer&tocompany=Acme Corporation&toname=Joe Blow&subject=An important fax for Joe&nocover=0&body=Joe please read these two items&filetype_1=html&filedata_1=hello<p>This is sample HTML&filetype_2=txt&filedata_2=This is sample text

Data can be posted via a web form (POST or GET), as well through a URL query string.

Response will be "OK|" if fax was sent, or "ERROR|" if not. If there was an error, it will be described after the "|"
