

Using ClickFax in a Terminal Services Environment

You will need version 1.5 or higher to do this. Please first check for updates. In ClickFax, go to File > Check For Program Updates. Install anything it alerts you to.

Printer Security

Members of the Users/Everyone Group must be able to:

Print Manage Printer Manage Documents

爹 ClickFax Pro Properties		? ×

What to do If the ClickFax Printer Does Not Install Correctly

If the printer port does not install, check for the following:

In c:\documents and settings\administrator\windows\system32 look for wddmonnt.dll and copy it to C:\WINDOWS or C:\WINNT.

In c:\documents and settings\administrator\windows\ for DFCFCapture.EXE and copy it to C:\WINDOWS or C:\WINNT.

Re-run C:\Program Files\DataFab\ClickFaxPro\Printer\DFCFPortInstall.EXE

Restart the ClickFax Control Panel to finish installing the printer.
